

I am opposed to the proposed rule changes giving LPFM priority over FM translator service. The only radio station I listen to is K-Love. This is a very positive station that many of the youth in our community (Tucson) are also listening to. The music provides positive, encouraging lyrics that build up, rather than some of the destructive things kids listen to. Ultimately, this has a big impact on how kids view the world and their attitudes and behavior. If K-LOVE's signal is replaced by an LPFM, I fear Tucson will no longer have access to this station.
